

Business: The company's principal activity is to develop and market biologically based solutions for the repair and replacement of damaged or inadequate human tissues in different clinical applications. The company's tissue matrix technology removes all cells from the tissue and preserves the tissue without damaging the essential biochemical and structural components necessary for normal tissue regeneration. The products of the company include: alloderm(R) for plastic reconstructive, burn and periodontal procedures; cymetra(tm) for non-surgical correction of soft tissue defects; repliform(tm) for urology and gynecology procedures; cryopreserved allograft skin for use as a temporary wound dressing in the treatment of burns; cymetra (R), a version of alloderm in particulate form; repliform(R) for urogynecologic procedures; graft jacket(R) for orthopedic applications and allocrat f(TM) dbm for bone grafting.

Business: The group's principal activities are to manufacture biomaterials and medical devices for use in various surgical markets and to provide related specialized contract aseptic manufacturing services. The group operates in two divisions: the hyaluronan division and the oral restorative division. The hyaluronan division develops and manufactures products utilizing hyaluronan, a naturally occurring carbohydrate that moisturizes the body tissues. The products are marketed through OEM and contract manufacturing alliances in gynecology and ophthalmologic surgery and veterinary medicine. The oral restorative division develops and markets precision surgical and prosthetic devices for the restoration of damaged dentition and associated support tissues and markets its products through direct sales in the United States, Italy, Germany, Sweden and through distributors in other foreign countries.

Business: The group's principal activity is to develop, manufacture and market proprietary smart card-enabled medical diagnostic devices. These devices are used to prevent, detect, monitor and control cholesterol. The diagnostic product line consists of hand-held card-enabled cholesterol monitors. The consumer device is designed for use at home by the consumers at-risk, cholesterol patients and health conscious consumers. The other products are designed for point-of-care facility-use by various medical professionals and pediatricians. The group markets through national and regional drug store chains, pharmacy-featuring grocery store chains, specialty catalog and Internet-based direct marketers and independent pharmacies.
