Business: The group's principal activities are to develop, manufacture and market selected therapeutic and diagnostic products. The group's operating segments are divided into health products and therapeutic development. As of 31-Dec-2002, the group derived revenues from the health products segment. Under the health products segment, the group markets research and commercial diagnostic assays and fine chemicals to research and clinical laboratories and other customers. The therapeutic products segment is focused on the development of new drugs to treat diseases associated with tissue damage from free radicals and reactive oxygen species. The group markets its products in the United States, the United Kingdom, France, Germany, Japan, Spain, Korea, China and other countries.

Business: The group's principal activities are to design and manufacture instruments and equipment used in the acquisition and processing of seismic data. The group also designs and manufactures thermal imaging equipment and distributes dry thermal film products to the commercial graphics industry. It operates in Asia, Canada, Europe, Japan, the Middle East and the United States. The customers for seismic products include contractors and major independent and government-owned oil and gas companies that either operate their own seismic crews or operate through contractors. The customers for commercial graphic products include specialized resellers that focus on the newsprint, silkscreen and corrugated box printing industries.
