Business: The group's principle activities are to design, manufacture and market a broad line of standard high performance linear integrated circuits. The products are used in the following applications: telecommunications, cellular telephones, networking products and satellite systems, notebook and desktop computers, computer peripherals, video/multimedia, industrial instrumentation, automotive electronics, factory automation, process control and military and space systems. The principal product categories that utilize the manufactured integrated circuits are amplifiers, high-speed amplifiers, voltage regulators, voltage references, interface circuits, data converters and other linear circuits. It markets the products worldwide, through direct sales staff, electronics distributors and a small network of independent sales representatives. The products are marketed to a broad range of customers in diverse industries. The group's total revenue for September 2007 was 1,083.08 millions of USD.
