**Business:** The group's principal activities are to design and manufacture highly engineered electrical and electronic components, modules and systems for the automotive, medium and heavy-duty truck and agricultural vehicle markets. The products comprise of vehicle electrical power and distribution systems, electronic and electrical switch products, electronic instrumentation and information display products, actuator and sensor products. The power and distribution systems regulate and direct the operation of the entire electrical system within a vehicle. The electronic and electromechanical switch products are used to activate headlights and other accessories. The electronic instrumentation and information display products display information such as speed, pressure and other messages related to vehicle performance. The actuator and sensor products enable users to deploy power functions and measure pressure and speed levels.
